

Warehouse Management System (WMS)

Production & Fulfillment Simplified

Streamline the fulfillment of orders generated from client stores with Propago's built-in production, inventory and warehouse management tools.

Easily manage products, inventory and orders throughout their entire life-cycle.

Propago streamlines and coordinates all aspects of operations, including manufacturing, procurement, order and inventory management, kitting, pick and pack, and distribution.

The system is built to handle any kind of product, regardless of where it's produced or shipped from. Propago can handle anything from a simple business card order to an extremely complex marketing kit of customized printed products and inventoried promotional items.

1. Streamline Production Workflows

Handle any workflow. Just in time (JIT), inventory pulls, drop shipping, print on demand (POD), kitting or a combination of all.

2. Optimize Procurement Processes

Keep inventory lean. The system auto-calculates what is needed to purchase based on inventory, demand, and open purchase orders.

3. Simplify Warehouse Management

Make it easy for your team. Intelligent workflows guide your team ensuring every order is produced and fulfilled as efficiently as possible.

4. Gain Better Insight into Your Operation

Optimize your operation. Access dashboards, real time inventory level reports, order volume details and recommended restock alerts.

5. Plan and Forecast Easily

Forecast intelligently. The system reads usage trends making it easy for you to plan for the next wave of demand and avoid running out of stock.

Inventory Management

- Bulk receiving
- Raw materials tracking
- Demand forecasting
- Cycle counts
- Serialization
- Lot tracing

Order Management

- Custom production queues
- Auto waving
- Order consolidator
- Batch processor
- Warehouse gun interface
- Returns management

Shipping and Fulfillment

- Major carriers integration
- Partial shipping
- Batch shipping
- Signature requirement
- Geo-routing
- Fast pick pack
